

Mobil in Time Group acquires nassag, Trocknungs- und Messtechnik AG

Mobil in Time Group («MiT Group»), the leading provider in the field of mobile energy solutions in Switzerland, acquires nassag Trocknungs- und Messtechnik AG («nassag») and thus expands its product range in the areas of water damage restoration, construction drying and dehumidification. The merger strengthens the Group's position as market leader with a broader range of services as well as an expanded regional footprint throughout Switzerland.

With over 20 years of experience in the fields of drying technology as well as pipe and leak detection, nassag Trocknungs- und Messtechnik AG is one of the leading players in Switzerland.

«After many years at nassag, as founder, owner and CEO, it was important to me to find the right partner who enables further growth and leads the company successfully into the next era. With MiT Group, I am certain that I have found a fair and future-oriented partner who shares our values and will continue to pursue a sustainable development,» says Christoph Schilliger, who will remain as board member and consultant of nassag as well as continues to be the president of the Aqua Sec Service association.

«We look forward to integrating nassag into the MiT Group. With its excellent reputation as a competent and professional service provider while sharing identical values such as reliability, quality and responsiveness, the company is an ideal fit for our group,» explains Stefan Moll-Thissen, CEO of MiT Group and continues: «Our clients will benefit from an expansion of our service offering while we maintain our goal of quality leadership.»

George Merk, Investment Director at Verium: «The existing locations of nassag in Basel, Bern and Zurich perfectly complement the existing network and geographical footprint of MiT Group. We are convinced that this will give us better market access in these regions. Together we will be able to pursue an entrepreneurial long-term growth strategy with regional presence throughout Switzerland.»

Verium is an independent multi-family office and manages direct investments in medium-sized companies in the DACH region for its investors. Latest investments include Home Instead, basefit.ch, Christ & Heiri, Toradex, Ceposa / Frische & Service, Quickmail, Mobil in Time / S&G, DSwiss, Zünd / Optivac and dbi services. Verium builds on its network and expertise to support its partners in both strategic and operational matters.

For this transaction, Verium was advised by Wenger & Vieli (Legal) and G&S Treuhand AG (Tax).

nassag, Trocknungs- und Messtechnik AG provides comprehensive services in locating and repairing water and moisture damages. As a proven specialist and reliable partner, the company serves private individuals, business clients and insurance companies. The core areas are leak detection, water damage restoration, dehumidification and construction drying.

Thanks to the successful and continuous development over the last years, nassag has grown to 20 employees today, with professional know-how and a large fleet of vehicles. The company has 3 locations in Giebenach, Höri and Schönbühl as well as 2 additional service points in Arch and Seengen.

The MiT Group also includes Mobil in Time and S&G Mobile Heizzentrale, two leading providers of mobile energy solutions in the fields of heating, cooling and steam.
